

THE CURRENT STATE OF ALZHEIMER'S As The Patient & Caregiver See It

- Our current medicines don't meet patient needs. What can we expect and how should we prepare?

- Early detection is complex without a biomarker. What else can we do to increase detection & diagnosis?

- We don't have enough skilled caregivers. How can training & technology fill this gap?

- In-home technological solutions can be a game-changer. But what are they? How do we get there?

- We're paying more attention to modifiable risk factors. How do we cascade this to low- & middle-income countries?

- Local initiatives improve lives. How can we encourage more local efforts?

"Anna"

- We know what good is. We just can't afford it. How can we fix this zero-sum game?

- Patients & caregivers hear us, but don't know what to do. How can the healthcare system help?

- Alzheimer's threatens a family's financial well-being. What can be done to make costs of care more manageable?

- Those who suffer from Alzheimer's lose their ability to make rational financial decisions. How can we help the family make this transition?
